Inventory during the promotion window: All 11 targeted SKU(s) opened the window with stock levels ranging from 8 to 100 units, sold 22 units between them, and closed with 6 to 100 units on hand; none of them stocked out. In the 17-day period immediately after the promotion (2023-06-30 to 2023-07-16), these items sold 6 units, a ratio of 0.40x relative to baseline -- a dip below baseline consistent with demand being pulled forward into the promotion period rather than representing durable new demand. 1 sale(s) attributed to this promotion also include another promotion in the same cart: Pro Markdown (id 111). Single-promotion attribution for those specific carts would be misleading, since the

cart's revenue is really shared between both promotions.

The remaining 4 targeted SKU(s) opened the window with stock levels ranging from 4 to 5 units, sold 9 units between them, and closed with 1 to 4 units on hand; none of them stocked out. Studio Deal Days (promotion id 108) was a Bundle Discount promotion offering a 12% discount, running from 2023-05-26 to 2023-06-07 (13 days). It targeted the "Prime & Perfect Trio" bundle (id 8, \$89.21, made up of Mattifying Cream Primer - 50ml, Velvet Liquid Concealer - Caramel - 5ml, and Satin Pressed Powder - Chestnut). In the 13-day baseline period before the promotion (2023-05-13 to 2023-05-25), these items sold 16 units for \$525.51. This promotion is classified as MIXED, because its ratios don't meet the criteria for LIFT, DUD, VOLUME UP/REVENUE DOWN, or STOCKOUT -- real movement occurred, but not a clean case either way. 13 transaction(s) redeemed this promotion, totaling 14 units (1 of these units belong to other, non-targeted items that happened to share the same carts, not to this promotion's own SKUs) and \$509.87 in revenue (average order value \$39.22). 31% of redeeming customers were under 25 close to the dataset-wide baseline of 41%. Inventory during the promotion window: All 3 targeted SKU(s) opened the window with stock levels ranging from 21 to 26 units, sold 13 units between them, and closed with 14 to 23 units on hand; none of them stocked out. In the 13-day period immediately after the promotion (2023-06-08 to 2023-06-20), these items sold 2 units, a ratio of 0.12x relative to baseline -- a dip below baseline consistent with demand being pulled forward into the promotion period rather than representing durable new demand. No sale attributed to this promotion shares a cart with any other promotion.
